YAMASHIN-FILTER CORP.

**YAMASHIN-FILTER obtains a score of B
on the CDP Climate Change 2023 questionnaire**

YAMASHIN-FILTER CORP (President: Atsuhiko Yamazaki) is pleased to announce that it obtained a score of B on the CDP Climate Change 2023 questionnaire on February 6th 2024.

The CDP is an international environmental non-profit organization founded in the United Kingdom in 2000 that collects, analyzes, and evaluates the environmental initiatives of companies and municipalities. The CDP evaluates on an eight-level (A, A-, B, B-, C, C-, D, D-) which we are ranked in the third highest management levels, four places up from a score of D obtained last year. The "B" management level score we received indicates that the company is "aware of and acting on its own environmental risks and impacts."

We endorsed the TCFD (Task Force on Climate-related Financial Disclosure) recommendations in 2022 and are accelerating our efforts to achieve carbon neutrality. We will continue to fulfill our social responsibility as a company that contributes to sustainable social and economic activities under the themes of Environment, Air quality, and Health as a comprehensive filter manufacturer in cooperation with our group companies operating globally.
